Chief, D/S

Comments on Proposed Series of Reports by D/T

1. The proposed series of summarized factory dossiers to be published by D/T is of interest principally to the Organizations and Management Branch of this Division. The type of report represented by the attached samples appears to be a useful first step in providing information desired by that Branch in connection with its study of Soviet plant and higher level management and decision-making. D/T personnel, in previous conversations with S/OM, have indicated that it might be possible eventually to summarize all information available from [REDACTED]

plant management, ministerial personnel and the relationships between plants. S/OM believes that the plant [REDACTED] which would be included in the [REDACTED] reports would be helpful, but hopes that the further analysis and presentation can eventually be carried out.

2. With respect to format, it is suggested that the following additional information be included:

a. A brief explanatory statement indicating the purpose and value of the report.

b. Some indication of the scale of each [REDACTED], as well as its location on the given product.
